Service at a Glance

The Mechanical Equipment Tracking System (METS) is an innovative, custom designed, secure, web-based tool for Moore Environmental Systems Limited customers to track equipment maintenance and repair.

Users can view locations where work is being performed, determine which technicians are performing the work, review equipment details including maintenance history, age, location, model/serial numbers, work order status, job costing, repairs required and recommended. Customers receive convenient and clear job reports by email!

METS is powerful, effective and user friendly. The platform is easy to learn and the screens are intuitive with simple navigation throughout the site.

Heating, ventilation, air conditioning and refrigeration equipment are investments. Reducing downtime and the costs of expensive repairs is how Moore Environmental Systems Limited continues to build upon its reputation of reliability and efficiency.

Visit www.mesl-hvac.ca to view a demonstration of this powerful tracking tool and learn more about what METS can do for you!

CUSTOM SOLUTIONS

MESL uses cutting edge technology to exceed customer expectations by:

- Maximizing cost efficiencies and forecasting budgets
- Tracking repairs/service costs
- Assessing equipment life expectancies and improving asset life
- Reducing paperwork and organizing records

About US

Moore Environmental Systems Limited is known for providing outstanding customer service and building relationships that last.

Leading the industry with over 50 years of collective experience, leveraging technology is just another way that MESL builds efficiency and excellence into every job.

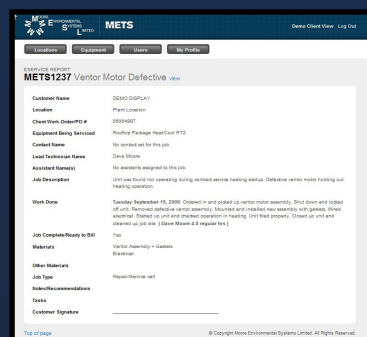

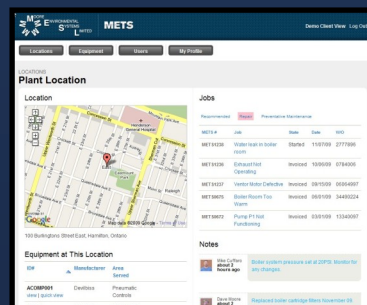

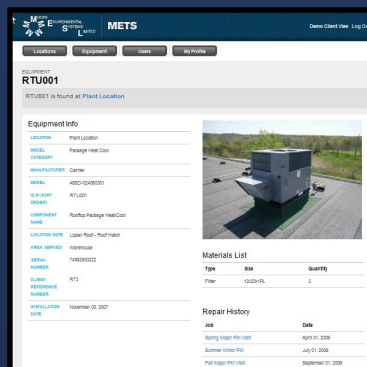

METS

METS—the MESL Connection

Track equipment maintenance and repairs with a click!

- Get an image of the equipment and where it is
- View equipment service history linked to jobs and Purchase Orders
- Track repairs required and recommended by location
- Export expense reports for accurate budgeting and cost effectiveness
- Receive immediate Service Reports by email

Secure, Efficient, Effective

Moore Environmental Systems Limited strives to meet and exceed customers' needs. It has always been our goal to assist customers to become more cost effective.

METS supports multiple users with different levels of accessibility. Clients can create profiles and define exactly what information contacts can and cannot view. The entire system is protected by a 128-bit SSL security encryption; the same as online banking.

METS provides value by:

- Reducing downtime
- Tracking costs by unit per location
- Maximizing cost efficiencies
- Prolonging asset lifetime
- Reducing paperwork and organizing records
- Assessing equipment life expectancy
- Improving budget accuracy
